Hi Ryan: Attached is the settlement agreement between CSD and WDNR as result of not installing the up-gradient wells.

MaryAnne is looking for more information on the NR 140 investigation.

Sincerely,

Cheryl Burdett

Cheryl,

It is too hot to do yard work as we had planned today, so I am trying to get a few things done.

You asked for the settlement agreement for Central Sands. This is the settlement and some additional information. We are going to look for more information on the NR 140 investigation. Jane Landretti worked with the farm through this process but she has gone to work for DOT so we have to search her files. Also, we received a comment during the public comment period on the concentration of N in the irrigation wells. We are still working on what to ask the farm to do to track that information through their NMP before we finalize the permit so I don't have anything to share with you on that issue yet.

Andrew,
I'm working on an ORR for Central Sands and EPA/DNR communications and I found this while pouring over my documents. I was thinking of sending both of these on to EPA. Do you see any problem with this?
